Green Drinks	Green Drinks is a place of meeting of people who cares about environment. During Green Drinks people have opportunity to meet colleagues, partners, future employers or employees. It is a place where in informal atmosphere people share ideas, endeavors, and projects on environmental issues.		Oct 2009 - ongoing
Conservation in Ukraine http://conservation.in.ua	Goal: promotion of conservation science in Ukrainian society. This website provides information for everybody interested in conservation of Ukrainian nature. Students will find here information on employment and internship possibilities in conservation, scientific advisors, and topics for research papers and theses. Scientists will be able to follow current conservation issues in Ukraine and in the world, discuss their researches, publications, and projects. Conservation organizations could share their experience, find partners, and invite volunteers to join. Journalists will find here interesting and hot topics. Nature enthusiasts will be surprised how many possibilities they have to enjoy nature and at the same time to practice conservation.		2009- 2012
Internet Portal development “Protected Areas in Ukraine” www.reserves.in.ua	Development of an Internet portal of conservation and protected areas in Ukraine. The main task of the project is to inform public about protected areas in Ukraine, possibilities to visit them, rights and responsibilities of visitors. Site is also a platform for the communication of scientific communities involved in any issues on PAs and conservation territories.	UNDP/GEF Strengthening governance and financial sustainability of the national protected area system in Ukraine	2008/2009
	The main purpose of the project was to raise environmental awareness of young people, to involve youth into solving of environmental problems, and implementation of sustainable development principles in their lives.	Heinrich Boell Stiftung, Ukraine	2008
“For Clean Ukraine” Project	Awareness raising campaign on climate change among students of Kyiv universities. During 5 weeks movies on Climate Change were presented in 10 universities in Kyiv.	Tetrapack in Ukraine	2007
Promoting green office concept among Ukrainian institutions	“Promoting green office concept among Ukrainian institutions” project is aimed at incorporating basic principles of sustainable development into Kyiv-Mohyla academy Strategy and green office concept into its day-to-day operation. Its overall mission is promoting this management philosophy among other Ukrainian institutions.	British Council	June 2006 – June 2007
Ecoportal ecoclubua.com	A portal of environmental news where people can share and spread principles of sustainable development in all spheres of social life.		Oct 2006 - ongoing
